

# Meadows Montessori is "bioactive neutralized"

We have teamed up with Bioactive. Bioactive uses a hospital disinfectant that has been tested effective as a sporicide, germicide, bactericide, fungicide and biocide. Its proprietary formulation makes it a unique disinfection system targeting and providing a rapid kill over the most harmful viruses, bacteria's, fungi, and mold spores while remaining safe and eco-friendly. It is able to eliminate malodors and biological matter from urine, feces, vomit, bodily fluids, sulfur, ammonia and much more.

Bioactive combines this hospital disinfectant with a sophisticated application method, electrostatic spraying technology. Their electrostatic spraying system has 300% better spray penetration and coverage onto hidden areas and hard to reach areas on both porous and non-porous surfaces. Studies also found that only 15-20% of the spray from conventional or fog sprayers ends up on the intended surface, with nearly 60% of the chemical wasted on the ground and less than 3% reaching the underside of the target and other hidden areas. Electrostatic spraying systems takes advantage of the principal of physics to achieve the highest efficacy for this type of application.

**we care**

Germes are about the only thing that two-year-olds will share freely! Knowing the trust you put in us we have taken every precaution to provide your child with a healthy learning environment.

Our entire school is bioactive neutralized providing a safe germ-free environment!

## Microbial control

Bioactive has partnered up with Meadows Montessori to provide a safe, germ free and bacteria free environment for your children. You can relax knowing our facility has been bioactive neutralized!

Children attending childcare have a 2 to 3 fold increase in risk for respiratory infections, ear infections, and diarrheal disease. The increased risk is independent of age, race, and social class. Importantly, though, this risk also decreases significantly when appropriate diapering, hand-washing, and disinfecting is performed on a regular basis.

Meadows Montessori takes a proactive solution to many of the ongoing challenges with childcares and schools. Meadows has teamed up with Bioactive a microbial control company that disinfects every cubic inch of our school. They use EPA hospital disinfectant that is non-toxic, non-corrosive, non-flammable, non-chlorinating, phosphate free, hypo-allergenic and a true biodegradable product. It produces a rapid kill over mold spores, bacteria's, viruses and causes no harm to your child or those with allergies, asthma or immune deficiencies. It does not emit or produce volatile organic compounds (VOC's). We are proud to say our school is "bioactive neutralized"!
